Technology Used

The application is currently available for android devices only. It is built using android development kit and JAVA. The cloud backend of the app is hosted on parse.com.

The app gets its data through Yahoo Finance (For Stocks), NSE India (For Bonds and ETFs), All India Mutual Fund Association (For Mutual Funds).

Applications

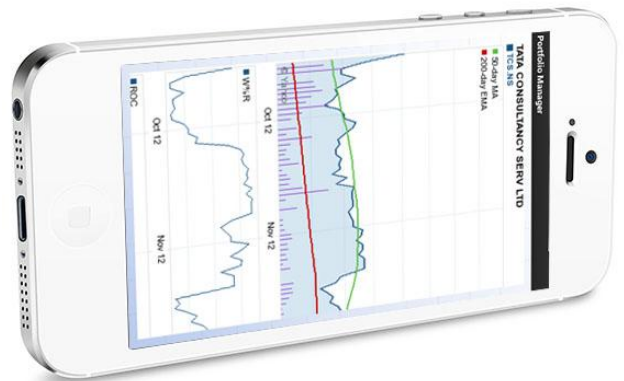

This application can serve as an excellent tool for educating potential investors before they take actual plunge. The app can be

- 1) Used to acquaint new users with complex trading softwares.
- 2) Used in various financial literacy programs organized at various levels.
- 3) Can be included in the curriculum of finance related courses in various B-Schools/Other Institutions

Future Scope

- 1) App can be enhanced to get real time data without any **delay**, by purchasing paid APIs
- 2) Introduction of Algorithmic trading
- 3) Making this app cross platform, i.e for all platforms like ios, windows8, BB10 etc.
